Channel Master
Outdoor TV Antenna Installation
Mounting on Sloping Eave

- Antenna Pro-Model CM-1776
- Mount Pro-Mount CM-3091
- Difficulty Moderate

Hello,

Thank you for reaching out to Channel Master for assistance in selecting the best TV antenna for your location. We understand the importance of ensuring you receive the best possible signal and enjoy your favorite channels without interruption.

I have carefully analyzed the predicted signal at your specific location, and I am pleased to provide you with a tailored recommendation to enhance your television viewing experience.

To see the list of channels that can be received at your location, along with their corresponding signal strengths and direction, enter your full street address in Channel Master TV Antenna Map tool: <https://www.channelmaster.com/pages/tv-antenna-map>

Based on my analysis of the predicted channels and signal strengths at your location, I highly recommend an outdoor antenna with UHF enhancement and a preamplifier for the maximum number of channels and reliable reception of all major broadcast channels (ABC, CBS, NBC, FOX, and PBS).

Recommended Outdoor Antenna and Signal Enhancement Equipment:

- [Channel Master Pro-Model Outdoor TV Antenna](#)
- [TV Antenna PreAmp 1](#)
- [UHF Extension for Pro-Model TV Antenna](#)

Optional Accessories:

- [Antenna Wall/Roof/Chimney Mount](#)
- [Cables and Connectors](#)

(For optimal results, we always recommend the installation of an outdoor antenna. Indoor or attic-installed antennas may not provide the same level of reliability due to signal degradation caused by building materials and signal interference resulting from signal bounce within attics or indoor environments.)

Channel Master has been around since 1949 and we are committed to providing you with the best customer experience. Our website provides a secure shopping experience and offers the convenience of using popular payment methods like Apple Pay, Amazon Pay, Pay Pal and all major credit cards.

I promise you will be pleased with the recommended setup and if you are not completely satisfied you can return it for a refund within 30 days of purchase.
